Office Action Summary

Art Unit: 1644

Amendment of 3/5/02 has been entered. Claims 1-23 are pending.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1. In order for all inventions to be examined, the appropriate additional examination fees must be paid.

Group I, claim(s) 1-17 and 22, drawn to contrast media and methods of production thereof.

Group II, claim(s) 18-21 and 23, drawn to methods of producing contrast media.

Note claim 19 has been placed with Group II. It is deemed applicant intended dependency from claim 18, rather than 16.

The inventions listed as Groups I-II do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons:

Since the IPEA has found prior art that anticipates or renders obvious the claims of Group(s) II, applicant has not provided a special technical feature which defines a contribution over the prior art, as required by PCT Rule 13.2, in order to provide for unity of invention. Separation of Group(s) II from Group(s) I is considered proper, since no claim of Group II requires that a signal unit be couple to a receptor at the C-terminal end of the latter. It is this site of coupling that was deemed by the IPEA to be applicant's contribution over the prior art.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
